

Clow Water Systems Partners with Tuscarawas Township for Adopt-A-Road Program

October 16, 2012

Clow Water Systems recently had the opportunity to partner with the Tuscarawas Township for the “Adopt-A-Road” Program. As part of this program, Clow team members play an active role in preserving and maintaining the streets throughout the Township by removing litter from designated roadways at least two times a year.

The benefits are significant! The program not only serves as an educational tool against littering, it also establishes stewardship of public lands. Improving the appearance of the area also helps promote tourism, development, and quality of life for all of the citizens. More importantly, the program saves taxpayer dollars because this valuable public service is performed by volunteers.

To show its appreciation, the Township will provide three Adopt-A-Road signs displaying the Clow Water logo, one at each major intersection of the adopted area, indicating that Clow has adopted that area. It is the responsibility of all of us to maintain our communities and to leave them better than we found them and the Clow Water team is doing just that.

Congratulations to all of the Clow Water volunteers for a job well done!
