Manchester Tank Unveils Redesigned Website to Enhance User Experience

Franklin, Tennessee – September 4, 2024: Manchester Tank & Equipment Co., a leading manufacturer and refurbisher of steel and aluminum low pressure tanks and cylinders for storage and transport of pressurized gas applications, is excited to announce the launch of its newly redesigned website: manchestertank.com. The new site features a streamlined, modern design, improved functionality, and easy access to essential information to help customers make well-informed decisions about their DOT cylinders and ASME pressure vessel options.

“Our goal with this new website is to provide our visitors an easier way to learn about Manchester Tank's products, services, and solutions, while allowing them to navigate based on their preferences,” said Jordan de Lima, President. “The new website is interactive and offers improved access to key sections such as Products, Services, Resources, and Contact. Both current and prospective customers will find useful information about our product offerings and services right on the homepage.”

A standout feature of the redesigned website is the “Configure Your Tank” section. This tool enables visitors to customize their tanks to meet specific functional and branding needs. Users can select hardware like valves and gauges, choose paint and lid or dome colors, and explore various technology and branding options, enhancing their engagement with the site.

“We are excited to launch our new company website for our customers, partners, and visitors who want to understand the full scope of Manchester Tank’s products and services,” added Tom Stikeleather, Director of Sales. “Our commitment to quality, service, and simplicity is reflected in every aspect of the new site.”

Visitors are encouraged to explore the new website, which will be regularly updated with news on product launches, business activities, corporate milestones, and events.
